

AIMto SUSTAIN

AIM SA has implemented a comprehensive Sustainable Development strategy that drives and integrates socially and environmentally sustainable business processes and decision making practices.

We are undertaking activity in three key areas:

ENVIRONMENTAL

Comply with environmental legislative requirements applicable to our business

Implement an Environmental Management System (EMS) that improves our environmental performance

Continuously improve our environmental performance and reduce our environmental footprint

SOCIAL

Continuously improve our performance as a socially responsible organisation, making a positive contribution to the community

Provide our employees with the knowledge to achieve a culture that supports sustainable practices

ECONOMIC

Communicate our Sustainable Development policies and practices to our staff, stakeholders and the broader community

Educate our stakeholders and the broader community on leading Sustainable Development practices

Develop collaborative partnerships with organisations that align with our business values

The Sustainable Development strategies of AIM SA have been embedded into its Strategic and Business Plans and the policy is available via our website aimsa.com.au
